TO WHOM IT MAY CONCERN

I am pleased to recommend **Beamlak Tarekegn**, who completed a two-month internship at **Ethiopian Postal Service (Ethiopost).**

During his internship, **Beamlak Tarekegn** was assigned to the IT/Application Development team, where he demonstrated a strong interest in software development and a willingness to learn and take responsibility for assigned tasks.

One of his major contributions during the internship was the **development of a Library Management System for Ethiopost**. Through this project, he was able to apply his knowledge of software development to a practical organizational requirement. He participated in understanding requirements, designing the system, developing the application, testing its functionality, and making improvements based on feedback.

During his stay, Beamlak Tarekegn demonstrated **good technical potential, problem-solving ability, willingness to learn, and commitment to completing assigned tasks**. He was also able to adapt to a professional working environment and communicate with team members while working on his project.

Based on his performance and contribution during the internship, I believe that **Beamlak Tarekegn has good potential to further develop his skills and pursue a career in software development and information technology**. I am pleased to recommend him for future academic, professional, or internship opportunities.

I wish him every success in his future career and studies.

Sincerely,

Ibrahim Kedir
Technology Director
